

Rotary Pouch Packer - Features & Benefits

- 
- No pouch jams on pouch infeed conveyor using a wider drive belt (patented).
  - Cylinder type gripper is an inherent robust design and prevents dirt from building up - sanitary design for food packaging.
  - Spring inside gripper design prevents corrosion and dirty springs, as well as eliminates the risk of a broken spring falling into a pouch.
  - Easy pouch size changeover in 5 minutes.
  - Horizontal movement of gripper pusher prevents grippers from bending (patented).
  - Electrical cabinet is on top of machine to prevent water and dust from easily entering.
  - No springs with mechanical cams reduce vibration and bouncing at high speeds which results in less maintenance.
  - Automatic grease pump for central lubrication of mechanical cams is a standard feature.
  - Robustly built machine that weighs 6,600 lbs. - outer components are made of 304 stainless steel, anodized aluminum alloys, and food grade plastic.

Pre-Made Pouch Configurations

Rotary Pouch Packer - Durable Design & Compact Footprint

Machine Models

Model:	JR-6S2540	JR-8S1024	JR-8S1331	JR-8D0915	JF-8S0815
Speed* (pouches per minute):	10 - 30	30 - 50	30 - 50	60 - 90	30 - 40
Pouch Size Range (mm):					
Width:	250 - 400	100 - 245	130 - 310	90 - 150	80 - 150
Length:	up to 470	up to 400	up to 470	up to 400	up to 400

\*Production speed depends on product, pouch type/set and filling volume.

Technical Specifications

Power Consumption:	4.5kW (3 phase)
Air Consumption:	14 cfm (350 l/min), 80-100 psi
Touchscreen/Controls:	Allen-Bradley
Main Drive Motor:	SEW (Germany)
Pneumatics:	SMC
